

SCUBA DIVING

DISCOVER
THE
UNKNOWN!

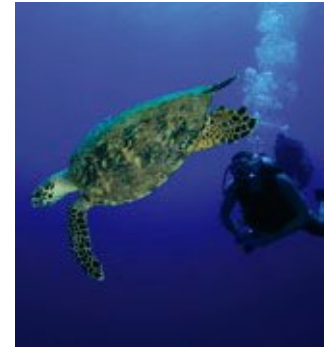

Our highly qualified PADI certified dive team offers you diverse dive experiences. You will travel to the dive sites aboard our 47 foot Scuba Adventure, the most comfortable and well designed dive boat in Cabo, approved by the US Coast Guard with full bathroom and fresh water showers aboard. Our highly experienced dive masters will accompany you for your safety and comfort. Rest assured, we have been in the scuba diving business for 15 years.

Beginners and recently certified divers can dive the shallow reef off the North Wall and observe a great variety of marine life. Certified divers will hopefully dive among the amusing sea lions at the Land's End canyon, while at Neptune's Finger you will experience the famous sand falls surrounded by turtles, mantas and angel fish. Finally at Pelican's Rock you can observe sea horses and tropical fish as well as schools of rays and jacks (no sighting is guaranteed)

For divers who would like to go one step further, ask for more information about our PADI Certification Programs.

"I am extremely impressed! From our guide Raul, to the deckhand Victor, the captain Peter, and the underwater photographer. They were all professional, fun and easy to work with. They brought us out on a big, very clean boat, had a bathroom on board, snacks, water and a sundeck up above for resting/viewing between dives. After the first dive, Peter took us out to see the rock formations and the Arch. I would go back in a heartbeat. I'll see you in the future."

Captainfrat, Boston MA. Jan 24, 2010.
